

# S | R RETAIL SOFTWARE

THE FLEXIBLE COMPLETE SOLUTION FOR YOUR INVENTORY MANAGEMENT

[SPORTS-RENTAL.COM](http://SPORTS-RENTAL.COM)

NEVER CHANGE A *WINNING TEAM*

# S|R RETAIL POS/INVENTORY MANAGEMENT EVERYTHING UNDER CONTROL

S|R Retail is a complete software system for your materials management. From order management, to checkout to statistical evaluation, you will find all of the components you require under a single interface.

With S|R Retail you have all of the key factors under control. You have an overview of suppliers, customers, orders, deliveries, checkout and evaluation. We facilitate your day-to-day business with a clever order and delivery function and the easy operation of the system.

#### S|R RETAIL IS DISTINGUISHED BY

- being particularly easy to operate
- having many well-thought-out solutions
- being highly flexible in its ability to adapt to the circumstances of the business

»THIS SOFTWARE FULLY MEETS OUR REQUIREMENTS. IT BECOMES EVIDENT THAT THE OPERATING CONCEPT OF S|R RETAIL HAS BEEN DEVELOPED FROM PRACTICAL EXPERIENCE.«

Oester Sport, Adelboden

# ORGANIZATION STRUCTURED HANDLING

## BASIC FUNCTIONS

The key aspect of ERP is the perfect organization of inventory, order and delivery.

Inventory can be structured and organised as you choose with SJR Retail. You are not bound by a predefined structure. Nevertheless, the stock keeping unit that is included provides you with the option of making use of the benefits of a fixed structure.

Both options can be used in parallel and, if required, are inter-transferable.

## MODULE SPORTS AND FASHION

With the stock keeping unit the option for sport and fashion is available.

# ORGANIZATION OVERVIEW AND CONTROL

## IN ORDER

Search and list functions help you to maintain an overview. Orders, deliveries and transfers to another branch can be quickly completed by item.

In addition to the powerful reports of the SJR Reporter, you are always informed about the products current status.

- Deliveries, transfers or inventory adjustments can be completed directly by item
- Orders can be added to at will by Multiselect or Drag&Drop
- Control of order receipt and partial deliveries, as well as easy and quick order replenishment

YOUR DAILY  
BUSINESS

The screenshot displays the 'SPORTS RENTAL - [Stammdaten Artikel]' application window. The interface is divided into several sections:

- Navigation Bar:** Includes tabs for 'Artikel', 'Kunden', 'Kontakte', 'Preise', 'Statistik', 'Listen', and 'Optionen'.
- Product List Table:** A table with columns: Bezeichnung, Notiz, Bestellcode, Farbe, Größe, Hersteller, Hausgröße, Develop, and Filiale. It lists various ski equipment items like 'E-Kart M Jr. Skiset', 'Kessler Phantom', and 'Muscle Car'.
- Product Tree:** A hierarchical tree on the left side showing categories like 'Produkte', 'Rental', 'Depot', 'Retail', and 'Ski Alpin'.
- Item Detail Panel:** Located at the bottom, it shows details for a selected item (ID: 1501023280), including its name, type, price, and stock status.
- Image Gallery:** On the right side of the detail panel, there are thumbnail images of the selected ski equipment.

# ORGANIZATION

## SAVE TIME BY FLEXIBLE DATA IMPORT

# ORGANIZATION

## AVOID ERRORS BY FLEXIBLE DATA IMPORT

### FLEXIBLE DATA IMPORT

Of particular benefit is the option of importing product data directly. The optional FlexImport solves the problem of the time-consuming manual input of new product, order or delivery data.

The persistent problem of inconsistent file formats from suppliers and manufacturers is solved by the SJR Flex Import. It simplifies data input for new products significantly. With the Flex-Import of SJR Retail, the manual input of product data becomes a thing of the past.

The order confirmation or delivery note sent by the supplier as a file can be imported in one go, without any typing and typing errors. This makes the process of setting up new products for the next season much easier and faster. The import formats of different suppliers can be adapted, saved and recalled. Of course, you can still enter the delivery / order manually with a barcode scanner.

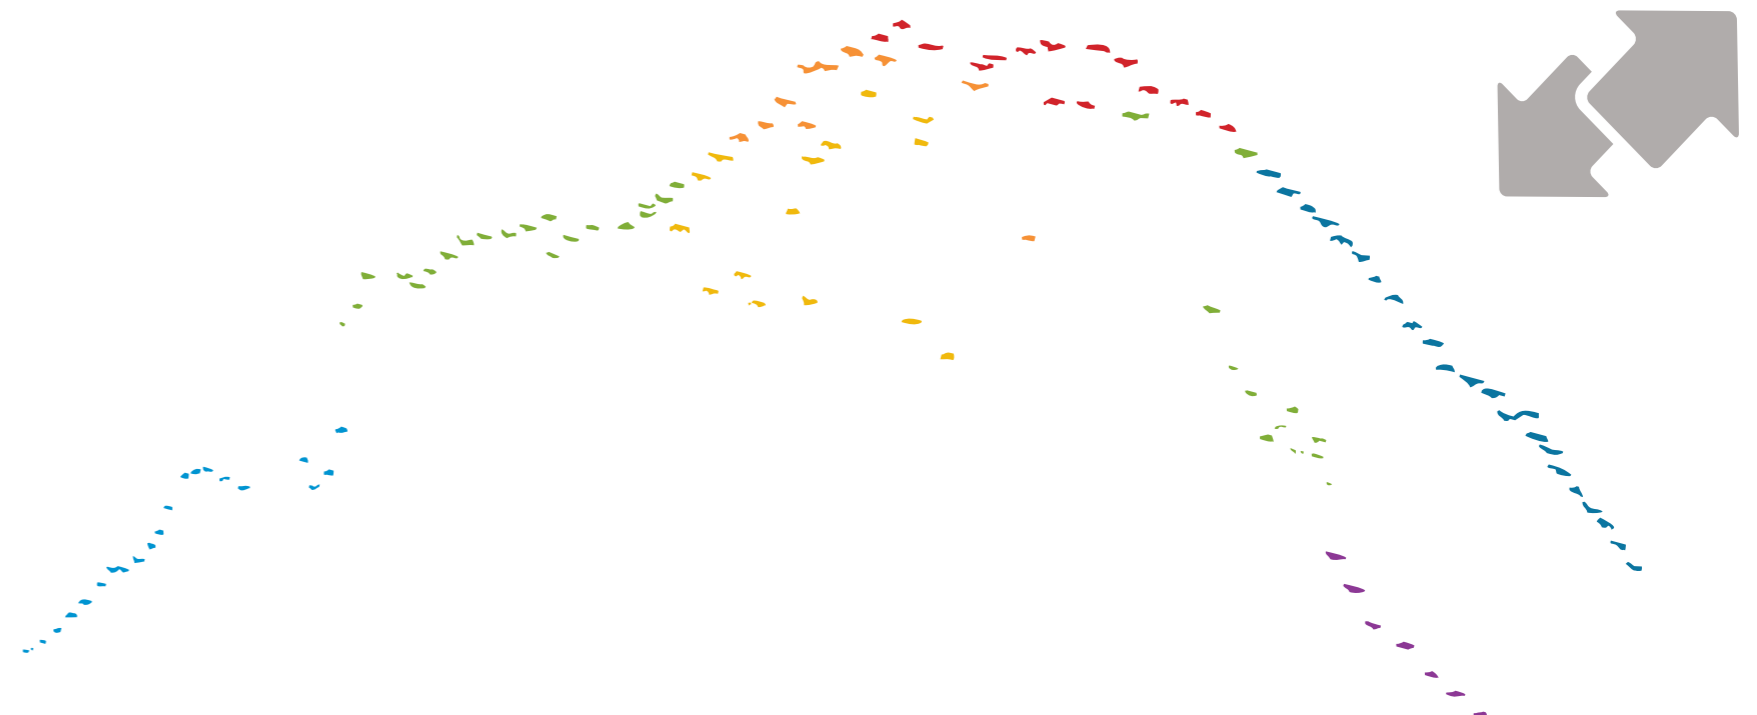

IT'S  
SO EASY

### DELIVERIES AND ORDERS IN ONE GO

In the age of the computer, typing out a delivery note should be a thing of the past. Orders and deliveries can also be entered without the need for any typing. Many providers send order and delivery data also e-mail, so that they can be directly imported.

*The Flex-Import mask is multi-functional. You can also see an overview of how the data will be imported.*

# CASH REGISTER

## BILLING WITH A LOT PAYMENT OPTIONS

# CASH REGISTER

## TOUCH

### THE S|R RETAIL CASH REGISTER

A cash register is automatically available at every workstation. It is not necessary to define certain workstations as cash registers. If required, any workstation upon which S|R Retail has been installed can be used as a cash register.

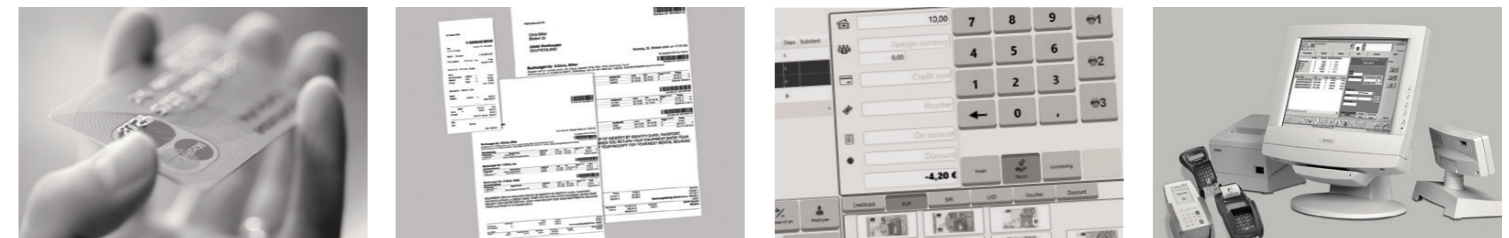

### FEATURES

- The S|R Retail cash register can process various types of payment at the same time.
- The credit card module offers the opportunity of direct online payment by credit card.
- Individual or group billing optional.

### FUNCTIONS

- Any form of payment: in advance, partial payment
- Cash
- Foreign currency with conversion factor
- Voucher
- Credit card
- Payment on account
- Separate payment of reservation, rental, return, sale
- Rounding amounts

Of course S|R Retail directly links up the standard cash register components like display, printer and drawer.

# REPORTING

## PERFECT ANALYSIS

### WITH THE S|R RETAIL REPORTER

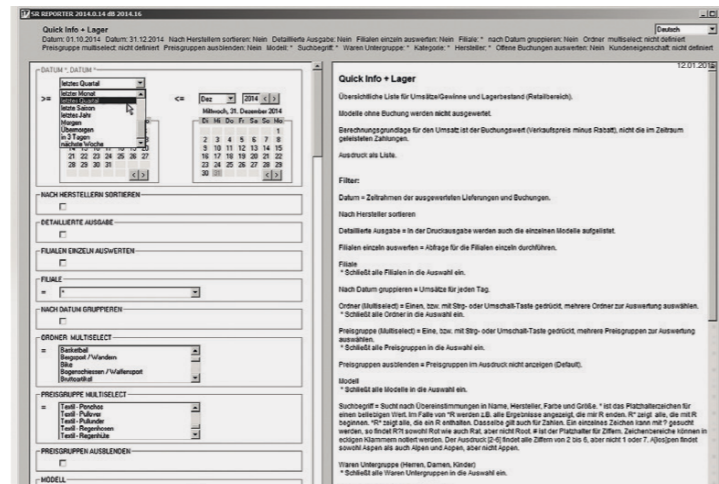

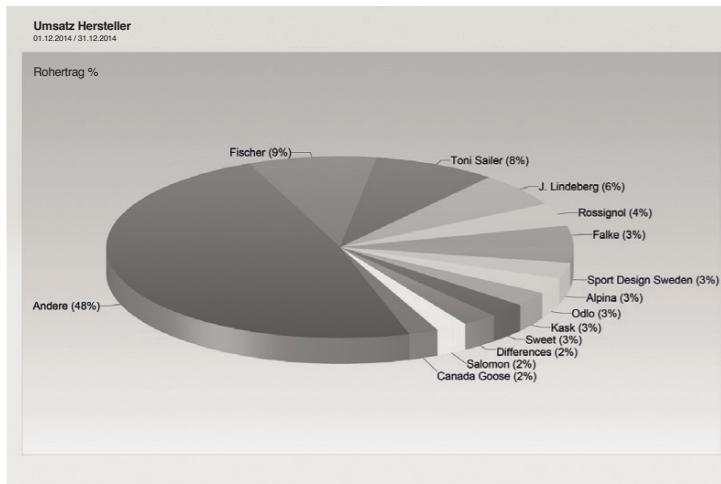

#### DECISION SUPPORT BY REPORTING

Correct analysis of the fiscal year determines future success. With S|R Retail evaluation functions you have a decision support.

#### THE S|R REPORTER

The Reporter is the evaluation tool that provides the information in a suitable format. Every report has a wide range of filter options. The information can therefore be customised to meet the individual's or current requirements.

The individual reports that are put together can be saved in so-called presets. The next time a click is all that is needed and the information you require is compiled.

The comfortable inventory function compares the inventory data with the stock. The depreciation calculation allows various depreciation schemes for inventory analysis.

# FACTS S|R RETAIL

## HANDLING

- Optional input devices: scanner, mouse, keyboard, touch screen, terminal, handheld
- Particularly easy handling by controlling the daily routine functions using optional barcode scanner and SPORTSRENTAL barcode panels
